Math 1 Changes Summer 2025

Note that the numbers below refer to the 2025–2026 edition, unless followed by a ('24) in which case they refer to the 2024–2025 edition.

503	changed the . at the end of part (e) to a ?
626	edited commentary, changed to minus sign in the equation $\frac{x}{1100} - \frac{x}{16500} = 6$
710	edited commentary, added "Alternatively, one could have x represent the dimension of the inner square" at the end
715	edited commentary, replaced "transcendental and complex" with "the factored form contains non-integers" and deleted the duplicate "was"
725	edited answer/commentary, switched the reasoning for (b) and (d) as well as for (c) and (f).
803	edited answer in (c) and (d), minor wording change in commentary
804	edited answer, replaced 2.4 with 0.4
